Client	Patient	Age	Date
--------	---------	-----	------

****Please return form on your scheduled surgery day****

Our records show that your pet is scheduled for anesthesia in the near future. We would like you to look over this pre-anesthesia blood work form; fill it out, and bring it along with your pet on the day surgery is scheduled. Blood testing before anesthesia helps us detect any medical problems or blood abnormalities before anesthesia and surgery are performed. The blood test also allows us to get normal blood values for the animal for future reference.

Profile #1 Pre-anesthetic screen minor

This profile contains basic information required for proper health evaluation before any anesthetic procedure. It includes:

- Complete blood count (checks for anemia, infections, and clotting)
- BUN (kidney)
- ALT (liver)

Cost= \$62.50

Profile #2 Geriatric Screen (Patients over 7 years)

This test includes all tests of Profile #1 plus:

- Glucose (sugar diabetes)
- Calcium (certain cancers)
- Phosphorus (kidney)
- Amylase (pancreas)

Cost=\$76.50

Profile #3 Comprehensive Screen (complete patient screen)

This test includes all tests of Profiles #1 & #2 plus:

- A complete biochemical profile
- A complete urinalysis

Cost=\$107.50

Signature of owner

I have elected to refuse the recommended pre-anesthetic bloodwork at this time and request that you proceed with the anesthesia. I assume full financial responsibility for this animal. I understand that there is always a potential risk for anesthesia and surgery.
