## ***NATIONAL DENTAL HEALTH MONTH***

Dental problems can occur in all ages of dogs and cats. Poor oral health can cause serious health problems for the heart, liver, and kidneys. This is a preventable disease with proper diet and maintenance procedures. During February, which is ***National Dental Health Month***, the ***Chippewa Veterinary Clinic*** will offer a ***15% discount*** on all dental procedures. Call today if you have any questions or to make an appointment at 723-3655.

Dental Cleaning  
15% Discount  
Good Through 02-29-08

## ***WELLNESS FOR LIFE***

Throughout the life of your pet we want to make recommendations to insure a long and healthy life. A specific vaccination protocol will be mutually tailored for your pet depending on lifestyle and environmental factors. Diet, dental health, and weight control are very important issues to reduce risk for diabetes and arthritis. With your pet's yearly wellness exam we recommend a blood test to establish baseline values or to detect early disease. Normal values for your pet may be different than the standard averages for all dogs or cats. These values will help us determine if there are any individual changes in your pet as he or she ages.
